File Handling.

DESCRIPTION

As a developer, write a program to read, write, and append to a file.

Background of the problem statement:

As a developer, write Java code to read, write, and append to a file.

You must use the following:

- Eclipse/IntelliJ: An IDE to code for the application.
- Java: A programming language.
- Git: To connect and push files from the local system to GitHub.
- GitHub: To store the application code and track its versions.

Following requirements should be met:

- The versions of the code should be tracked on GitHub repositories.
- The code should work properly.

[Programming]
Steps to follow:
Project Name: FileHandling
Package Name: com.filehandlingsofi
